

**THE GUILD OF
DEVONSHIRE RINGERS**

NORTH EAST BRANCH

2017

DEVELOPMENT PROGRAMME B

**PLAIN SINGLE HUNT
DOUBLES METHODS**

INTRODUCTION:

Doubles methods with the treble plain hunting may be separated into groups depending upon which method is rung above the treble. For example Plain Bob Doubles and Reverse Canterbury Place Doubles are two different methods, but they both have the same work below the treble - plain hunt. In this programme we will be concentrating on two groups of methods - those with Plain Bob above the treble and those with Reverse Canterbury Place above the treble. However, we will be ringing something other than plain hunting below the treble. There are fifteen different “works below the treble” which can be rung with either Plain Bob or Reverse Canterbury above the treble. Extents (120 changes) of these methods can be rung either with Bobs or by splicing two or more methods together without using Bobs. So there are 30 methods from which we can choose which ones to learn and ring. A diagram showing these methods will be available to those participating in this programme. The programme is divided into four phases:

PHASE 1 INTRODUCTION:

This phase runs from January to March 2017. During this period there are six opportunities to ring a selection of these 30 methods with either Plain Bob or Reverse Canterbury Place above the treble at Huntsham with a band of experienced helpers.

PHASE 2 CONSOLIDATION:

This phase runs from April until July. During this period participants will have the opportunity of developing skills in ringing these methods at the monthly Saturday morning six bell practices and at the weekly Branch practices on Monday, Tuesday, Thursday and Friday evenings.

PHASE 3 DEVELOPMENT:

This phase runs from the end of July until the middle of September. During this period there will be five further opportunities to explore a wider range of these methods including splicing two or three methods together without using Bobs.

PHASE 4 FURTHER EXPLORATION:

From mid September onwards there will be further opportunities to develop skills in ringing Plain Doubles methods either working from the 30 methods available using Plain Bob or Reverse Canterbury above the treble, or by introducing Shipway’s Place Doubles above the treble, which can be rung with the same 15 methods below the treble. How far we get depends upon our commitment and enthusiasm.

SUMMARY:

Obviously the more frequently one rings the quicker new skills may develop. This development programme is arranged so that the Huntsham based sessions are at different days and times of the week. Therefore please think carefully about how you will arrange your programme related ringing during 2017.

SUMMARY:

Over the whole year this development programme provides more than twenty opportunities to develop skills in ringing plain single hunt doubles methods. On eleven of these occasions there will be a committed support team in attendance. There will also be advanced notice with appropriate diagrams of the methods to be included within programme phases 1 and 3.

We appreciate that it may not be possible to attend all the sessions available in all four phases. However, we are restricting numbers so that those attending have ample opportunities to participate during each session.

With these issues very much in mind we are inviting participants to sign up for the whole development programme for a donation of £20.00. It will also be possible for participants to attend occasional sessions for a donation of £2.00 for each session, payable on arrival, provided there are sufficient places available, however preference will always be given to those seeking to participate for the whole programme.

The latest date for joining this development programme is Saturday 14 January at the six bell practice and places should be booked with [REDACTED].
